

I urge the FCC to reject the NAB's petition (04-160). I am a recent subscriber to XM Radio and have quickly come to appreciate the variety and quality of programming offered. I postponed my decision to purchase the equipment and subscribe because I was skeptical that the quality would be as good as advertised. I can now say I regret postponing my decision and I look forward to improvements in programming - improvements which the NAB is trying to thwart with petitions such as this one. My job requires me to drive to different cities, and I appreciate being able to quickly and easily access traffic and weather information for those locations.
